

Title

RESEARCH INTEGRATION WORKSHOP

Model Forest

Western Newfoundland Model Forest

From

May 1993

To

May 1993

Keywords

Workshop, Research, Data Standards, DSS

Objective

To promote awareness and understanding of the research project being carried out within the Western Newfoundland Model Forest and to establish a set of data acquisition standards to ensure the compatibility of Decision Support Systems.

Description

Research is seen as a key component of the Western Newfoundland Model Forest, and it provides a framework for developing an integrated resource management plan. The technical workshop for the integration of research programs was initiated to provide all those involved in the Model Forest with an understanding of the research being carried out under the auspice of the Western Newfoundland Model Forest. The workshop would also develop a set of data acquisition standards to be adopted by all research projects, to ensuring the compatibility of Decision Support Systems and eliminating duplication efforts between research initiatives.

Reports and Products**Proceedings from the Technical Workshop for the Integration of Research Programs.**
