

Title

BONNE BAY POND SURVEY.

Model Forest

Western Newfoundland Model Forest

From

July 1999

To

August 1999

Keywords

Harvesting, Management, CFAC, Survey

Objective

To inform cabin owners in the area of the Five Year Operating Plan and the spatial extent of forest harvesting within the Bonne Bay Pond area and determine their major concerns.

Description

The Five Year Timber Harvesting Plan is a detailed proposal of forest management activities in the Big Bonne Bay area. Seventy-seven surveys were conducted consisting of six questions addressing awareness and concerns of cabin owners in the area. From the people surveyed, the majority believe they will be affected by the Five Year Harvesting Plan and have concerns about the environment and recreational activities.
