

Title

CURRENT REGULATIONS, GUIDELINES AND BEST MANAGEMENT PRACTICES CONCERNING FOREST HARVESTING AND RIPARIAN ZONE MANAGEMENT

Model Forest

Western Newfoundland Model Forest

From**To**

July 2003

Keywords

Best management practices, riparian zone, stabilizers, harvesting, managed buffers

Objective

Literature research study on BMP's and guidelines for harvesting in riparian zones in provinces and territories across Canada.

Description

Riparian protection is a common practice across all provinces and territories. The purpose of this report is to 1) examine the role of riparian buffers in minimizing the impacts of forestry operations, 2) review the current regulation and guidelines of forest harvesting and riparian zone management across Canada and 3) obtain optimal design objectives for harvesting within riparian zone buffers in Newfoundland and Labrador
